

# Freeze - True Wireless Stereo Earphones

SKU: TEJZEARTWSFREEZEBTW

## Enjoy an immersive listening experience with Environmental Noise Cancellation technology

### WHY BUY FREEZE EARPHONES

These **wireless in-ear headphones** are a versatile accessory: True wireless stereo earbuds automatically pair by themselves and can be powered with a **wireless charger**. They are also perfect and easy to use for listening to music and calls, even in mono.

### WIRELESS CHARGING: AN EASY AND INNOVATIVE WAY TO POWER YOUR EARPHONES

The **Freeze earphones** are powered by the 300 mAh charging base included in the package. You can recharge them wirelessly in **two different ways**: either with a **charger** such as a charging base or using a **reverse wireless charging smartphone**. Place the Freeze base on top of one of the two accessories and the wireless power supply will start **automatically**.

### USE ONE EARPHONE OR BOTH WITH DUAL LEADER TECHNOLOGY

True Wireless earphones can be used either **in mono**, i.e. using only one, or in **stereo mode**, using both. You can therefore leave one earbud in the base so as not to waste the battery.

### YOUR CALLS WILL ALWAYS BE CLEAR WITH ENVIRONMENTAL NOISE CANCELLATION (ENC) TECHNOLOGY

**Freeze** earphones can **recognise and cancel background noise** using **ENC (Environmental Noise Cancellation) technology**. In this way, your voice is clear when using the earphones even in places that are not completely silent. Make calls anywhere without worrying about noise from your surroundings.

### PERFORMANCE: MUSIC AND LONG CALLS

With a single charge, the wireless earphones guarantee **up to 5 hours of continuous use**. Using the integrated keys, you can manage the playback of music tracks and answer or end calls.

The base, if fully charged, guarantees an overall use of the Freeze earbuds for **22 hours**.

## COMFORT OF USE

The package contains **size S and L rubber pads** that **reduce the perception of external noises** and guarantee an optimal fit according to your needs.

## KEY FEATURES:

- In-ear design
- Wireless V 5.2 technology
- True Wireless Stereo technology earphone technology
- Dual Leader technology for mono use with a single earphone
- ENC (Environmental Noise Cancellation) technology that cancels background noise
  
- Range up to 10 metres
